盈帆报表设计器部署说明

1.解压

将 EFSpreadSheet 文件夹放到磁盘中,以 D 盘为例。

2.修改配置文件

2.1 设置 tomcat 端口

可以使用服务默认的8080端口,如需改动需要进入

"D:/EFSpreadSheet/conf"目录下,打开"server.xml"文件,在

"<Connector port="8080" protocol="HTTP/1.1""位置设置端口。

```
Connector port="8080" protocol="HTTP/1.1"

connectionTimeout="20000"

redirectPort="8443"

compression="on"

compressionMinSize="2048"

noCompressionUserAgents="gozilla,traviata"

compressableMimeType="text/html,text/xml,text/javascript,application/x-javascript,application/javascript,text/css,text/plain,application/wasm"/>

compressableMimeType="text/html,text/xml,text/javascript,application/javascript,text/css,text/plain,application/wasm"/>

compressableMimeType="text/html,text/xml,text/javascript,application/x-javascript,application/javascript,text/css,text/plain,application/wasm"/>

compressableMimeType="text/html,text/xml,text/javascript,application/x-javascript,text/css,text/plain,application/wasm"/>

compressableMimeType="text/html,text/xml,text/javascript,application/yascript,text/css,text/plain,application/wasm"/>

compressableMimeType="text/html,text/xml,text/javascript,application/yascript,text/css,text/plain,application/wasm"/>

compressableMimeType="text/html,text/xml,text/javascript,application/yascript,text/css,text/plain,application/wasm"/>

compressableMimeType="text/html,text/xml,text/javascript,application/yascript,text/css,text/plain,application/wasm"/>

compressableMimeType="text/html,text/xml,text/javascript,application/yascript,text/css,text/plain,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yascript,application/yas
```

2.2 设置配置文件

查看部署的机器 IP, 修改配置数据文件。

进入"D:/EFSpreadSheet/webapps/ROOT"目录下,用编辑器打开"index.html",配置数据文件位置。

```
| let example = 'http://127.0.0.1:8080/templates/example.cel';
| let base = "http://127.0.0.1:8080/wasm/font/sinsun.ttc', 'http://127.0.0.1:8080/wasm/font/simhei.ttf']
| let fonts = ('http://127.0.0.1:8080/wasm/font/sinsun.ttc', 'http://127.0.0.1:8080/wasm/font/simhei.ttf']
| let javascripts = ('http://127.0.0.1:8080/wasm/javascript/Olnumeric.min.js', 'http://127.0.0.1:8080/wasm/javascript/Olnumeric.min.js', 'http://127.0.0.1:8080/wasm/javascript/Olnumeric.min.js', 'http://127.0.0.1:8080/wasm/javascript/Olformida.js', 'http://127.0.0.1:8080/wasm/javascript/Odformida.js', 'http://12
```

"example"设置默认加载的模板文件,可不设置,不设置时,

显示空的内容。

"base"设置盈帆报表的后台地址,没有盈帆报表后台服务时, 无法使用导出功能。

- "fonts"设置设计器加载的字体数组。
- "javascripts"设置实际公式计算时需要使用的 JS 文件数组,需要按照顺序进行配置。
 - "fontNameUrl"字体中英文对照表。
 - "spread"实际插件的位置。

3.启动服务

进入"D:/EFSpreadSheet/bin"下,启动"startup.bat"脚本。

4.浏览器访问

使用谷歌内核浏览器,打开网页"http://实际的服务器 IP:实际设置的端口号"即可访问。

5.关闭服务

不再使用系统时,可进入"D:/EFSpreadSheet/bin"下,启动 "shutdown.bat"脚本,关闭服务。
